Once in there, you can select English as your language, or select the language from a drop down. This will be located on the bottom right. To change your language, download the appropriate language pack (through Origin or Steam) and manually extract the.pak file into that folder. Identification and quantification of DNA adducts and mutation from mouse hair follicles exposed to 1,2,4,7,8-pentachlorodibenzofuran by coupled gas chromatography-mass spectrometry. To determine the mutagenicity of a bioassay-selected environmental contaminant, 1,2,4,7,8-pentachlorodibenzofuran (PeCDF), 1-week mouse hair follicles were collected and treated in vitro with PeCDF for 24 h at 37 degrees C. DNA was isolated from these follicles and the extent of DNA adduct formation and mutation induced in the follicles was determined by gas chromatography-mass spectrometry
